Contents of Volume 20

No. 1

Review Article

J.R. Nevins (U.S.A.)
Utilization of cellular transcription factors for adenovirus-induced transcription 1

Research Papers

J.-s. Li, I. Fourel, C. Jaquet and C. Trépo (France)
Decreased replication capacity of a duck hepatitis B virus mutant with altered distal pre-S region 11

J.A. López-Guerrero, F. Martínez-Abarca, M. Fresno, L. Carrasco and M.A. Alonso (Spain)
Cell type determines the relative proportions of (−) and (+) strand RNA during poliovirus replication 23

M. Niikura, Y. Matsuura, M. Hattori, M. Onuma and T. Mikami (Japan)
Characterization of haemagglutinin-neuraminidase glycoprotein of Newcastle disease virus expressed by a recombinant baculovirus 31

Y. Matsubara, R. Watanabe and F. Taguchi (Japan)
Neurovirulence of six different murine coronavirus JHMV variants for rats 45

T.A. McKee and C.M. Preston (U.K.)
Identification of two protein binding sites within the varicella-zoster virus major immediate early gene promoter 59

E.F. Arko, J.I. Daksis and V.-L. Chan (Canada)
Further characterization of *ts*1-8, a mutant of herpes simplex virus type 1 71

J. Lacy, A. Bartiss and D.L. Coleman (U.S.A.)
Conversion of a human B cell lymphoma line by Epstein-Barr virus is associated with increased tyrosine phosphorylation of a 50 kilodalton cytosolic protein 85

A. Dolan, M. Arbuckle and D.J. McGeoch (U.K.)
Sequence analysis of the splice junction in the transcript of herpes simplex virus type 1 gene UL15 97

Book Reviews

B. Lewin: Genes IV. Reviewed by O. Kew 105

M.B.A. Oldstone and H. Koprowski: Infections of the Nervous System: Current and Future Perspectives. Reviewed by J.E. Kaplan 106

No. 2

Research Papers

B. Delmas and H. Laude (France)
Carbohydrate-induced conformational changes strongly modulate the antigenicity of coronavirus TGEV glycoproteins S and M 107

D.C. Henley and J.P. Weir (U.S.A.)
The relative stability of selected herpes simplex virus type 1 mRNAs 121

J.T. McClintock, D. Guzo, K.P. Guthrie and E.M. Dougherty (U.S.A.)
DNA-binding proteins of baculovirus-infected cells during permissive and semipermissive replication 133

G. Risuleo, G. Melucci-Vigo and G. Magnusson (Italy, Sweden)
Reduced *Polyomavirus* DNA replication as a consequence of a late-region deletion that results in early mRNA instability 147

C.-F. Yang, L. De, B.P. Holloway, M.A. Pallansch and O.M. Kew (U.S.A.)
Detection and identification of vaccine-related polioviruses by the polymerase chain reaction 159

L.J. Chandler, G. Hogge, M. Endres, D.R. Jacoby, N. Nathanson and B.J. Beaty (U.S.A.)
Reassortment of La Crosse and Tahyna bunyaviruses in *Aedes triseriatus* mosquitoes 181

Z. Wroblewska, J.G. Spivack, J. Otte, I.S.M. Brown, A. MacLean and N.W. Fraser (U.S.A.)
The HSV-1 latency associated transcript (LAT) variants 1704 and 1705 are glycoprotein C negative 193

Book Reviews

S. Edward and P.-P. Pastoret: Advances in Veterinary Virology. Reviewed by F.A. Murphy 201

P. Roy and B.M. Gorman: Bluetonge Viruses. Reviewed by V. Tanga 202

Announcement 203

No. 3

Research Papers

A. Rösen-Wolff, W. Lamadé, C. Berkowitz, Y. Becker and G. Darai (F.R.G., Israel)
Elimination of UL56 gene by insertion of LacZ cassette between nucleotide position 116030 to 121753 of the herpes simplex virus type 1 genome abrogates intraperitoneal pathogenicity in tree shrews and mice 205

J.M. Slavicek (U.S.A.)
Temporal analysis and spatial mapping of *Lymantria dispar* nuclear polyhedrosis virus transcripts and in vitro translation polypeptides 223

B. Dasmahapatra, E.J. Rozhon, A.M. Hart, S. Cox, S. Tracy and J. Schwartz (U.S.A.)
Cell-free expression of the coxsackievirus 3C protease using the translational initiation signal of an insect virus RNA and its characterization 237

C.L. Yang, D.A. Stetler and R.F. Weaver (U.S.A.)
Structural comparison of the *Autographa californica* nuclear polyhedrosis virus-induced RNA polymerase and the three nuclear RNA polymerases from the host, *Spodoptera frugiperda* 251

R.J. Yáñez, A. Moya, E. Viñuela and E. Domingo (Spain)
Repetitive nucleotide sequencing of a dispensable DNA segment in a clonal population of African swine fever virus 265

295

H. Iwata, T. Hirasawa and P. Roy (U.S.A., U.K.)
Complete nucleotide sequence of segment 5 of epizootic haemorrhagic disease virus; the outer capsid protein VP5 is homologous to the VP5 protein of bluetongue virus 273
